

John Bryant Jamison, M.D.
1941-1982

Dr. John B. Jamison, who had practiced radiology in Flagstaff, Arizona for 12 years, was tragically killed on Labor Day, September 6, 1982 while performing his duty as a volunteer deputy sheriff. Dr. Jamison was born in 1941 in Houston, Texas and he received the bachelor of arts degree from the University of Texas in 1962 and the medical doctor degree as well in 1965. His excellent academic achievement while a medical school student was recognized by membership in the Alpha Omega Alpha Society.

After internship at Hermann Hospital in Houston and radiology residency at the University of Texas in Galveston, John served in the United States Air Force Reserve and held the rank of captain. He was certified by the American Board of Radiology in 1976. Dr. Jamison was a Diplomate of both the American Board of Radiology and the American Board of Nuclear Medicine.

He was a member of the American College of Radiology, the Radiological Society of North America, the Flying Physicians Association, and the Coconino County Medical Society, where in 1976 he served as President. On several occasions he was the delegate to the annual American Medical Association convention from Coconino County. At the time of his death, Dr. Jamison was Secretary of the medical staff at Flagstaff Medical Center and was in partnership practice at Northern Arizona Radiology, P.C.

John served the entire northern Arizona community as a radiologist and established modern angiography at the Flagstaff Medical Center. He also travelled to many hospitals scattered throughout the area and to the Navajo Indian reservation, bringing quality radiology to the hospitals and clinics outside of Flagstaff. On numerous occasions, John would fly his airplane in threatening weather to these small facilities to provide timely radiology service.

Dr. Jamison is survived by his wife and two young children. The staff at the medical center and the community as a whole mourn his death as he was well known and well liked.
